

On July 9th, 2007 Andrea Grymes from News 12, The Bronx interviewed Dr. Mark Fromer about the importance of wearing sunglasses with ultraviolet protection. The segment compared several costly sunglasses to economical pairs to see if they provide sufficient ultraviolet protection. The results were surprising. "You don't have to pay a fortune to get adequate protection from ultraviolet rays," said Dr. Fromer. He also pointed out that large lenses give better coverage to the skin around the eyes.
