

On March 28th 2007, Marisa Cespedes from Televisa Station interviewed Dr. Mark Fromer about the affects of BOTOX® Cosmetic on patients with migraine headaches. In this segment Dr. Fromer discussed how BOTOX® Cosmetic has been used to treat many conditions. It can also reduce or eliminate frown lines, forehead creases, crows feet near the eyes. In 2002 BOTOX® Cosmetic was FDA approved for cosmetic use; some patients who had received BOTOX® Cosmetic for cosmetic reasons reported that their headaches or migraines also improved.
