

Fromer Eye Centers

Ocular Disease with Emphasis in Cornea and Contact Lenses/Refractive and Ocular Surgery Residency Program

Mission Statement

The mission of the Residency in Ocular Disease with Emphasis in Cornea and Contact Lenses/Refractive and Ocular Surgery at Fromer Eye Centers is to offer qualified optometrists advanced clinical training and education in the diagnosis and treatment of ocular disease in a private practice environment. The program will prepare the resident to work confidently and efficiently as part of a dynamic team of professionals including ophthalmologists, optometrists, ophthalmic technicians, opticians, and administrative personnel.

About Us

Fromer Eye Centers provides comprehensive eye care utilizing state of the art modalities and treatment options. Our physicians are board-certified ophthalmologists and optometrists who have earned national reputations as top clinicians and educators. We offer treatments for cataracts, macular degeneration, diabetic retinopathy, glaucoma, corneal disorders, retinal detachments, uveitis and dry eye syndromes. Our specialists are trained in cosmetic and reconstructive surgery of the eyelid. Our practice provides comprehensive examinations for eyeglasses, contact lenses and laser vision correction.

Fromer Eye Centers offers services in the following sub-specialties:

- Retina-Vitreous
- Glaucoma
- Oculoplastics and Eyelid Reconstruction
- Cornea and Anterior Segment
- Pediatrics

About the Program:

Fromer Eye Centers (FEC) started the first private practice Ocular Disease Residency Program in New York in July 2012. The residency in Ocular Disease with Emphasis in Cornea and Contact Lenses/Refractive and Ocular Surgery at Fromer Eye Centers will provide the resident with advanced clinical training and education necessary to deliver comprehensive ophthalmic care that meets the needs of a diverse population of patients having ocular disease. The resident will have responsibilities in patient care and patient education. They will also participate in emergency care triaging as part of their on-call duties. The resident will be expected to provide a full range of ophthalmic patient care services with emphasis in the differential diagnosis and treatment of ocular disease and visual pathway dysfunction. They will have the opportunity to work alongside ophthalmologists specializing in retina, glaucoma,

cornea, oculoplastics and pediatrics. They will also be involved with specialty contact lenses and low vision. They will provide pre- and post-operative care as well as co-manage refractive surgery patients and observe ocular surgical procedures. The resident will be a member of a multi-disciplinary healthcare team and be responsible for appropriate utilization of the practice's resources and personnel. Training will be accomplished through direct patient care, seminars, grand rounds and independent study. As a member of the FEC staff, the resident will also be expected to attend and participate in FEC staff meetings, trainings and retreats. These sessions will expose the resident to the inner workings and practice management intricacies of private practice.

The residency program is accredited by the Accreditation Council on Optometric Education (ACOE). For more information, please contact accredit@theacoe.org.

About the Residency Supervisors:

Marina Su, O.D., F.A.A.O., Director of Optometry, received her Doctor of Optometry degree from South California College of Optometry and completed an ocular disease residency at Fromer Eye Centers in the Bronx, NY, affiliated with SUNY College of Optometry. Dr. Su is a Fellow of the American Academy of Optometry and a member of the American Optometric Association, New York State Optometric Association and College of Optometrists in Vision Development. Dr. Su is an Adjunct Associate Clinical Professor at SUNY College of Optometry.
